Job Description

Oil and filter lubrication service. Check all external lights and lamp conditions. Check all windscreen wiper blade conditions. Check for any warning lamps on in instrument panel. Drain engine oil, remove and replace oil filter, refit oil sump plug with a new washer and replace engine oil. Check fluid conditions and all levels under the bonnet, and top up as necessary. Check all tyre conditions and pressures, including the spare tyre and adjust as necessary. Check battery condition and carry out load test. Check condition of external engine drive belts. Report on any additional items found during the service inspection.

Reset service indicator light where applicable, date and stamp service booklet if available and replace windscreen service sticker.

VEHICLE SERVICE BRAKE INSPECTION REPORT

Front Brake Remaining 15% / Rear Brake Remaining 75%

TYRE CONDITION REPORT

RHF:5mm LHF:5mm RHR:4mm LHR:4mm SPARE:N/A

PLEASE NOTE: MINIMUM LEGAL REQUIREMENT = >1.5mm

With vehicle raised and road wheels removed, clean, inspect and adjust brakes. Strip front brakes. Reset caliper pistons & lubricate caliper slides. Examine condition of disc rotors (clean, machine or replace as required).

Assemble using new brake pads. Top up brake fluid reservoir with fresh brake fluid. Roadtest and carry out initial bedding in procedure. Check drivability, ok.
